Algebra 1 Summer Assignment
Standard and Honors

Algebra 1 is a high school level course and in order to make sure students are prepared, all Algebra 1 students are required to demonstrate mastery of Pre-Algebra skills. Mastery of these standards are foundational to the understanding of Algebra 1 standards.

Millennium Middle School requires that all incoming Algebra 1 students show 75% mastery of Pre-Algebra skills by Sunday, September 1, 2019 through Khan Academy. After starting the Pre-Algebra Mastery Path, Khan Academy’s adaptive software and instant feedback will guide students on their individual learning path to allow students to practice skills, master skills, and focus efforts as needed.

Student’s work will be linked to their Algebra teacher at the beginning of the school year for mastery monitoring.

Directions:

1. Through the SCPS Portal account; go to Class Tools – Khan Academy

2. In the upper left corner, click courses

3. Click on Pre-Algebra course
4. Start with Arithmetic Properties

5. On the left, you can see your percentage mastered.

Each time you return to your path in Khan Academy it is important to **actively work on the mastery path**. Any skills completed outside of the Pre-Algebra Mastery Path do not count towards the progress completion.

Do not delay! Begin working on Khan Academy today!
